

OBERDORFER PUMPS

N3000LR (SYRUP/ SAP)

FEATURES

- Bronze corrosion resistant castings
- Special cast bronze helical gears for quiet operation
- Stainless steel shafts & fasteners
- Synthetic braided compression packing (with Teflon® dispersion) is standard
- Optional lip seals are available
- Positive displacement flow
- Bronze bearing surfaces with grease fittings

N4000L (SYRUP/ SAP)

FEATURES

- Bronze corrosion resistant castings
- Special cast bronze helical gears for quiet operation
- Stainless steel shafts & fasteners
- Synthetic braided compression packing (with Teflon® dispersion) is standard
- Optional lip seals are available
- Positive displacement flow
- Bronze bearing surfaces with grease fittings

N4000LR (SYRUP/ SAP)

FEATURES

- Bronze corrosion resistant castings
- Special cast bronze helical gears for quiet operation
- Stainless steel shafts & fasteners
- Synthetic braided compression packing (with Teflon® dispersion) is standard
- Optional lip seals are available
- Positive displacement flow
- Bronze bearing surfaces with grease fittings

S4000L (FOOD GRADE)

FEATURES

- Rugged Investment Cast Stainless Steel Housing
- Drop-in replacement for N4000L
- Fully "Biofood" grade
- Taylored to serve Maple Syrup Filter Press applications.
- Graphitized Silicon Carbide Sleeve Bearings
- Hardened Stainless Steel Shafts
- Stainless Steel Gears
- Viton Cover O-ring
- Lubrication Fittings
- Synthetic braided compression packing with teflon dispersion

OBERDORFER PUMPS

N7000L (SYRUP/ SAP)

FEATURES

- Bronze corrosion resistant castings
- Special cast bronze helical gears for quiet operation
- Stainless steel shafts & fasteners
- Synthetic braided compression packing (with Teflon® dispersion) is standard
- Optional lip seals are available
- Positive displacement flow
- Bronze bearing surfaces with grease fittings

N7000LR (SYRUP/ SAP)

FEATURES

- Bronze corrosion resistant castings
- Special cast bronze helical gears for quiet operation
- Stainless steel shafts & fasteners
- Synthetic braided compression packing (with Teflon® dispersion) is standard
- Optional lip seals are available
- Positive displacement flow
- Bronze bearing surfaces with grease fittings

N9000L (GREASE, LUBE, OILS)

FEATURES

- Bronze corrosion resistant castings
- Special cast bronze helical gears for quiet operation
- Stainless steel shafts & fasteners
- Synthetic braided compression packing (with Teflon® dispersion) is standard
- Optional lip seals are available
- Positive displacement flow
- Bronze bearing surfaces with grease fittings

N992R (GREASE, LUBE, OILS, DE-ICER)

FEATURES

- Compact design eases installation and use in limited space areas.
- Construction is bronze and stainless steel wetted components.
- Close tolerance design allows for consistent performance.
- Self-Lubricating Bearings
- Complete Units Available
- Slotted Motor Base
- Permanent Magnet Rigid Base Motors

VARIABLE SPEED DRIVES AVAILABLE

OTHER APPLICATIONS FOR THESE PUMPS INCLUDE:

TRANSFER PUMP FOR DIESEL FUEL, LUBE OILS; PRESSURE PUMP FOR DECK WASHDOWN, CLEANING BOUYS & AUXILIARY STEERING PUMPS FOR BARGES
